Summary

Backend Software Engineer with over 3 years of experience in the C#/.NET ecosystem and cloud architectures on Microsoft Azure. Experienced in infrastructure provisioning and design using Terraform, CI/CD continuous deployment pipelines, serverless solutions, and containerized microservices. Holding a Master's degree in Artificial Intelligence | Data Engineering, focused on machine/deep learning, LLM-based systems, AI agent workflows and production data pipelines with Python.

Education

Universidad Internacional de La Rioja (UNIR)
Artificial Intelligence | Data Engineering • Master's Degree
Present

Universidad de Alicante (UA)
Computer Science / Computer Engineering • Bachelor's Degree
Jun 2023

Experience

[Entelgy] Aranzadi LA LEY
Software Engineer

Madrid (Remote)
Jun 2023 - Present

- Designed, developed, and maintained backend applications and services using .NET, SOLID principles, and unit testing to ensure high availability and code maintainability.
- Provisioned and managed Azure cloud resources using Terraform to automate environments, reduce setup times, and guarantee reproducible deployments.
- Integrated applications into DevOps CI/CD pipelines, automating software testing and accelerating time-to-market in production environments.
- Integrated Artificial Intelligence models via the OpenAI API to automate manual business processes.

VSN Innovation & Media Solutions
Software Engineer Intern

Sant Joan d'Alacant
Jul 2021 - Aug 2021

- Developed an automated log monitoring application based on Natural Language Processing (NLP) using C# and ANTLR.
